Pachakuti ($PAKA) Whitepaper

1. Introduction

Revolutionizing Crypto for Humanitarian Impact

Pachakuti ($PAKA) is a **Solana-based token** designed to empower sustainable humanitarian projects, starting with the **Q'eros Water of Life Project**—a mission to provide clean water to the indigenous Q'eros people of Peru. By leveraging **DeFi, fair-launch principles, and staking incentives**, $PAKA enables global participation in impact-driven funding while ensuring long-term ecosystem sustainability.

---

2. Vision & Mission

Vision

To create a **blockchain-powered regenerative finance (ReFi) ecosystem** that funds real-world impact projects while offering economic incentives for token holders.

Mission

- **Provide clean water, sanitary waste disposal, sustainable energy solutions, and Bio-Resonant Living education** to indigenous communities through blockchain-based funding.
- **Enable decentralized impact investing** using transparent tokenomics.
- **Foster long-term sustainability** by integrating staking rewards and liquidity incentives.
- **Align DeFi with social good** by connecting investors to humanitarian projects.

---

3. Tokenomics

Total Supply: 1,000,000,000 PAKA (1 Billion)

Category	Allocation (%)	Purpose

Liquidity Pool (LP)	30%	Ensures stable trading & price control
Public Sale (IDO on Solanium)	20%	Tokens available for fundraising to support liquidity and project funding
Ecosystem & Staking	15%	Rewards for long-term holders & governance participation
Treasury & Development	15%	Supports future project expansions, partnerships, and staking pools
Charity Fund (Q'eros Water of Life)	10%	Direct contributions to clean water initiatives
Marketing & Incentives	5%	Airdrops, community growth, and investor incentives
Team & Advisory (Vested)	5%	Secured funds for long-term project sustainability

📌 **20% of the total supply will be available for sale during the Solanium Fair Launch to raise funds for liquidity, development, and the Q'eros Water of Life Project.**

---

4. Fair Launch on Solanium

$PAKA follows a **100% fair launch model** via **Solanium**, ensuring decentralization and equitable distribution:

What is an IDO?

An **Initial DEX Offering (IDO)** is a decentralized way to launch a new cryptocurrency, allowing public participation in the token sale before it goes live on exchanges. Unlike traditional fundraising, an IDO ensures transparency, community-driven investment, and immediate liquidity.

PAKA IDO Structure

- **IDO Fundraising Goal:** 100 - 500 SOL
- **Presale Price:** 1 SOL = 100,000 PAKA
- **Liquidity Pool Funding:** 50% of funds raised
- **Project Funding (Water of Life & Development):** 50% of funds raised
- **Vesting:** Team tokens locked for **6 months, then released 10% per month**
- **Staking & Governance:** Token holders participate in ecosystem decisions and earn rewards

How the IDO Helps Fund the Water of Life Project

✅ **Public Sale on Solanium** – 20% of PAKA's total supply is sold during the **IDO fundraising event**. ✅ **Funds Raised in SOL** – Investors buy PAKA with SOL, and the funds are used to:

- **50%** → **Liquidity Pool** (for price stability & trading).
- **50%** → **Project Funding** (Q'eros Water of Life & future development). ✅ **Sustainable Funding Model** – Ongoing **staking rewards & transaction fees** also contribute to the Water of Life initiative.

---

5. Use Cases & Utility

1. Funding Clean Water Access

- **A portion of transaction fees and staking rewards** will go directly to the Q'eros Water of Life Project.
- Transparent reporting ensures full accountability of fund usage.

2. Staking & Passive Rewards

- $PAKA holders can **stake their tokens for yield generation**.
- Governance-based rewards encourage long-term community participation.

3. Sustainable DeFi Ecosystem

- Integration with **Raydium liquidity pools** enhances decentralized trading.
- Future expansion includes **NFT-based charity funding** and **impact-driven DAOs**.

6. Roadmap

Phase 1: Token Creation & Fair Launch (Q1 2024)

- Deploy $PAKA token on Solana blockchain ✅
- Secure IDO listing on **Solanium** ✅
- Initial fundraising & liquidity pool setup ✅
- Community engagement & marketing campaigns ✅

Phase 2: Utility Expansion & Partnerships (Q2-Q3 2024)

- Implement **staking mechanisms** & governance voting ⚡
- Launch **first $PAKA-funded clean water infrastructure project** in Peru 🚰
- Form strategic partnerships with **impact-driven blockchain communities** 🤝

Phase 3: Scaling Impact & Growth (Q4 2024 & Beyond)

- Expand funding model to **new humanitarian initiatives globally** 🌍
- Develop **NFT-based philanthropic incentives** 🎨
- List $PAKA on **Tier-1 exchanges** for enhanced adoption 📈

7. Team & Advisors

$PAKA is developed by **a dedicated team of blockchain developers, sustainability experts, and humanitarian project leaders** with extensive experience in **crypto economics, DeFi ecosystems, and real-world philanthropy**.

8. How to Participate

📢 **IDO Access:** [Insert Solanium Fair Launch Link]
💰 **Join Staking & Governance:** [Link to Platform]
🌍 **Support the Water of Life Project:** [Official Website]
